

THE VARTA DYNAMIC TRIO. TAILOR-MADE POWER FOR EVERY CAR.

SILVER dynamic – high performance for high power demands. This powerhouse of a battery is the premium option in the VARTA dynamic Trio line-up. The SILVER dynamic delivers reliable energy supply even on vehicles with above average electrical consumers. With their superior cold start performance even in the most extreme conditions, and their huge reserve capacity, these batteries set standards which exceed the requirements of the international vehicle manufacturers themselves.

BLUE dynamic – the powerful all-rounder.

The BLUE dynamic brand is already the most respected battery in the aftermarket. Hardly surprising really, since it is built to meet or exceed the exacting specifications of the car manufacturers and offers superior starting, excellent safety features and unbeatable reliability.

BLACK dynamic – a VARTA for those who previously went without.

Now there is a VARTA battery for every pocket. The ideal battery for older, smaller vehicles with lower electrical requirements, this battery offers premium VARTA quality at an unbeatable price. It is just the battery to match the depreciating value of older cars in the repair market.

BENEFITS OF THE SILVER DYNAMIC:

- OE specification for high-performance, premium vehicles
- Ideal for cars with lots of electrical equipment, whether factory or retro-fitted
- The market's premium battery option
- Particularly suitable for diesels
- Longer lifespan due to new PowerFrame technology

BENEFITS OF THE BLUE DYNAMIC:

- For all classes of vehicles, original equipment specifications for today's cars
- Especially suitable for new and nearly new cars with standard level of electrical equipment
- Most popular and trusted brand in the market place
- Longer lifespan due to new PowerFrame technology

BENEFITS OF THE BLACK DYNAMIC:

- For smaller and older vehicles
- VARTA quality for those who previously went without
- Reliable and safe performance
- Longer lifespan due to new PowerFrame technology
